

**OMNIS MANAGED PORTFOLIO SERVICE**

# OMPS Managed Portfolio Service monthly update for Cautious investors

**Robert Jeffrey**  
Chief Investment Officer

## Who is this investment for?

The Service is designed for a cautious investor, who should have:

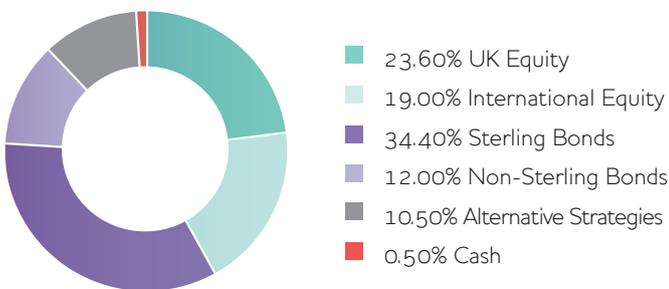

- Limited experience of investment products, and is probably more familiar with bank and building society accounts.
- An understanding that in general terms investment products should be held for a minimum period of five years.
- A preference for outcomes that have a degree of certainty, although they will understand that their investments could rise or fall.

The Service aims to improve total returns and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Openwork Wealth Services Limited investment team, which benefits from full transparency of the funds' underlying investments, and is controlled through a strict governance framework.

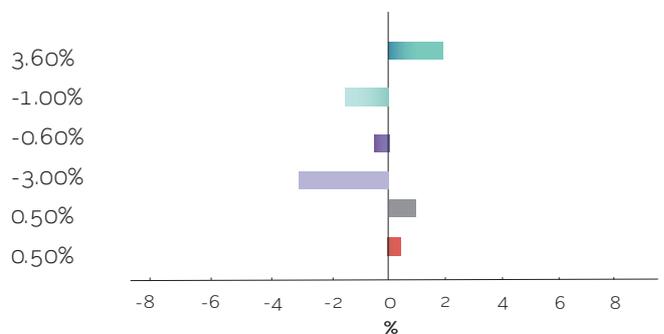

## The month in review

- The Cautious portfolio has a meaningful allocation to bonds because they fluctuate less than shares when the markets become difficult to navigate. Investors should achieve a more stable outcome, but the returns are likely to be lower than portfolios with a higher proportion of shares;
- The portfolio is overweight shares, underweight bonds, neutral alternative strategies and marginally overweight cash;
- Uncertainty has eased with the announcement of successful trials of several coronavirus vaccines, while Joe Biden has emerged as the winner of the US presidential election;
- We believe the improved outlook will benefit shares, so we added to our holdings in the UK All Companies Fund, the Income & Growth Fund and the Asia Pacific (excluding Japan) Fund;
- We also increased our allocation to both the Leaders and Opportunities Funds in Europe and emerging markets;
- We think bonds, which are considered a safe haven in times of market turbulence, will underperform in these more positive conditions, so we reduced our allocation to our Short-Dated Bond and Absolute Return Bond Funds;
- We also used some of our cash holdings to increase the portfolio's exposure to the stock market;
- In keeping with our active approach to portfolio management, we monitor the issues influencing the markets, particularly the global economic recovery from the pandemic and efforts by the UK and EU to negotiate a free trade deal before the Brexit transition period ends on 31st December.

## Current Asset Allocation

## Overweight/underweight position relative to Strategic Asset Allocation

## Past performance

1 month	3 months	6 months	1 year	Since launch 24/4/17
4.89%	4.59%	4.87%	3.24%	12.28%
